### Journalism Team on the Job Hunt!

On Academy Day, the journalism team got to meet and interview people that have careers that greatly impact the community. The jobs they learned about through presentations included a lawyer, banker, endocrinologist, and real-estate developer. The journalism team got a firsthand view of many different and interesting future professions.

and Alyssa Brafman

## An Event to Remember

This Academy Day, Mrs. Boundy's Speech and Debate class went on a trip to the Holocaust Memorial in Miami Beach. Mrs. Boundy chose this field trip because she thought it would be a good way to teach her students about the history of the Holocaust. At the memorial, the students learned about the Hol-

ocaust, saw the names of victims on the Memorial Wall, met a survivor of the Holocaust who described his personal experiences, and visited the Garden of Meditation. Student, Audrey Mallo, claims seeing the garden was her favorite part of the trip because it spreads a message that people around the world should listen to. The

students who went on the trip stated that this field trip was worthwhile, educational, and overall an experience to remember.

By: Jaden Zaitz, Gianna Vargas, and Malik McNeill

## A Dive Into the World of Science

This year on Academy Day, the Broadcasting and Computers classes went to the Museum of Science in Fort Lauderdale. The field trip cost \$22.00, but according to the students "It was well worth it." The students went to the aquarium where they saw many different varieties of marine animals, and learned all about Marine Biology. Most students said that,

"The highlight of our trip was when we went on the rollercoaster ride." Then they went to the Everglades ride where they learned about Florida's Everglades ecosystem. They also learned about programming and learned how to build many different items. Students took their own lunch to make it easier. They all enjoyed their day and had lots of fun. When asked what his only

complaint was, Abel St- Surin said "I wish it had lasted longer!"

By: Max Goldemberg, Mia Elias, and Gavriel Barcelo-Jeffers

## Picture Perfect

For academy day, the Mrs. Vidal-Santos' art class stayed on campus and painted a vectorized portrait. Their assignment was to pick a picture of themselves and design it is through vectorizing. Every now and then, they had little breaks where they ate pizza, socialized, and gave each other constructive criticism.

By: Yael Rubinovich, Rocco Acosta, and Elizabeth Rubal

## Raise The Curtains

For Academy Day, the drama elective had a dress rehearsal for their performance later in the year. They received feedback on their performance and learned how they could improve their show. Not only did they greatly benefit from the tips they learned, but they also enjoyed seeing their classmates perform.

## 3 For the Price of One

The Intensive and ESOL classes went to a few different places for academy day this year. Ms. Klahr, Ms. Etienne, Ms. Gambarte, and Ms. Hernandez's classes all went to Scott Rakow together. They took part in fun activities such as ice skating and bowling. They were there from 9:00 to 1:30. Other classes such as Ms. Rappaport's went to The Holocaust Memorial with Mr. Harris and

Ms. Boundy. The students watched a movie about the holocaust and met a survivor, which was very informational. They ate lunch there. Ms. Chipy, Ms. Lax, and Ms. Callado's classes all stayed on campus and had guest speakers come talk to the class. Each speaker was there for 45 minutes. Ms. Lax participated in getting the guest speakers who happened to be parents of students who attend to our school.

Each speaker had a different job including veterinarians, lawyers, advertisers, etc. Although these classes didn't stick together, it was a great way to experience different events.

By: Jed Hoffman, Matheus Ashford, and Melania Gogrichiani

## Techy Times

Robotics is a class where you learn coding and make video games. On Academy Day, they went to Aventura Mall for three hours. They visited stores such as Apple and Microsoft where they were met by instructors who gave them activities to do. In the Apple store, the class made an iMovie, which is a video editing software

program, and made a competition out of it. The winners, Julian Green and Vasilisa Tikhonv, said their video was one of the few finished and the funniest, making them the victors. The students (Julian Green and Vasilisa Tikhonv) said they enjoyed the trip and would go again if they could! Even though Julian enjoyed the field

trip, he says he felt like the field trip they went on last year was even better. Ms. Prada used three words to describe this field trip; techy, fun, and memorable. Overall, it seems like they had a fun time and an enjoyable field trip.

By: Joseph Oppenheimer, Sophia Martinez, and Diogo Guarita

## Tune Town

For academy day, the Orchestra and Band electives went to the all-county music store. Students were able to try out and purchase instruments. Many students bought slide whistles and harmonicas. When asked what he did on the field

trip, student Ikey Horowitz stated, "I rocked out on the piano and ukulele since I'm the coolest student in school." There was a sound proof part of the store where students could try out brass instruments, such as tubas. The drive took about an hour and students spent it lis-

tening to music and playing their instruments. The students enjoyed their academy day very much and got to experience using many different instruments.
